

Instructions to use Golf Genius Mobile App Scoring (revised 2-25)

Go to app store on your Android / iPhone. Search “Golf Genius”. Download and install.

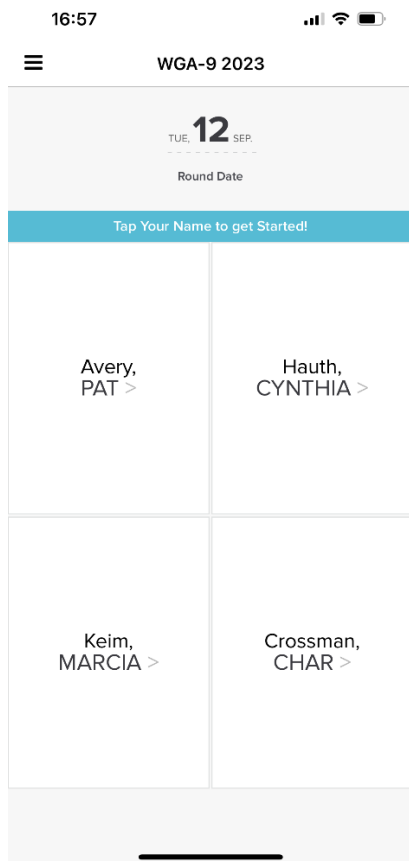

On tournament day, when you receive your printed scorecard, open the mobile app on your phone.

In order to do mobile scoring on the course during play, you need to have cellular data turned on.

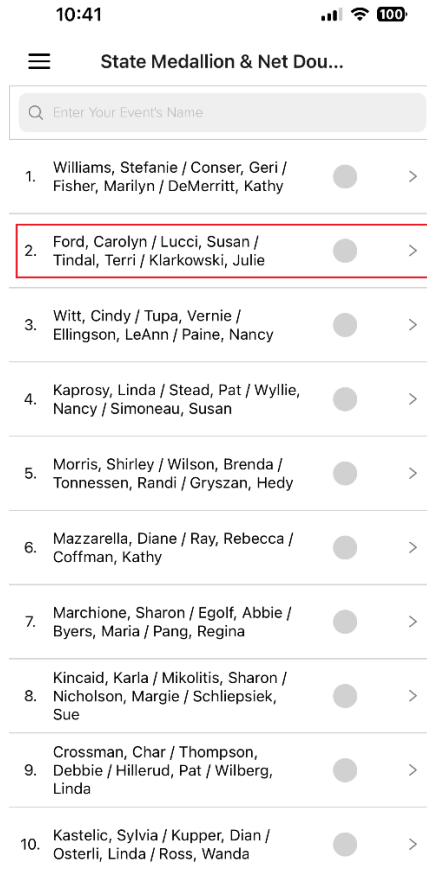

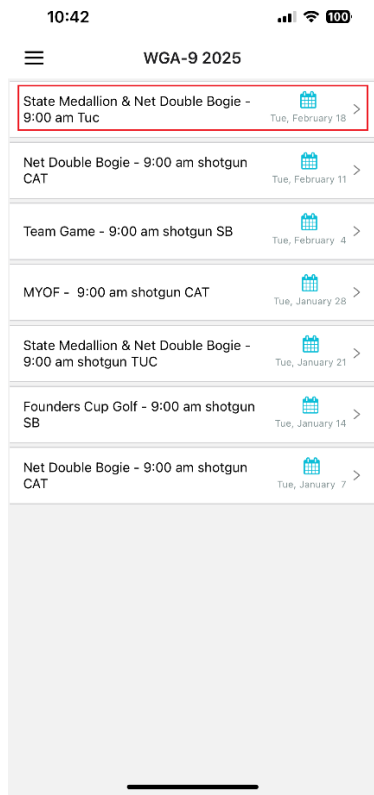

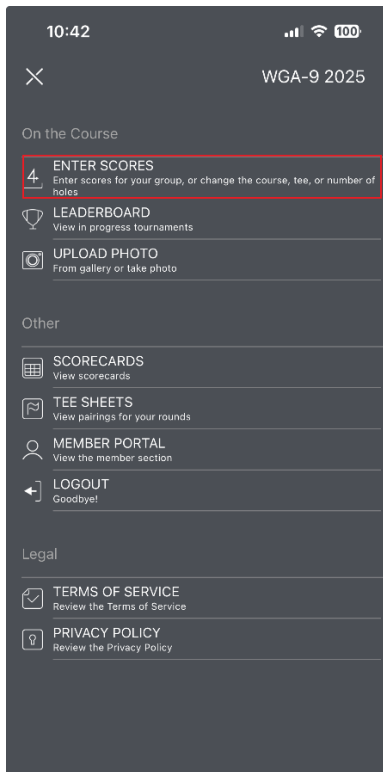

Enter the GGID found on your printed scorecard. (Alternately you may enter your email and password) The GGID is a 6-letter code. Do not enter both.

Only 1 Person per foursome may keep score on the App.

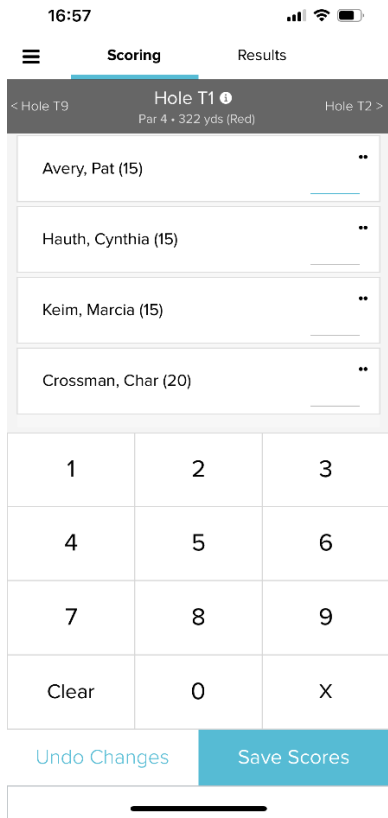

Click on your name from the group displayed if using the GGID from the scorecard.

If you sign in with your email/password, you will see the following screens. On the first screen you will need to click “Enter Scores”. This will bring up the second screen where you will choose the correct day of play by clicking the arrow. Then the third screen will come up. Use the arrow to choose your foursome.

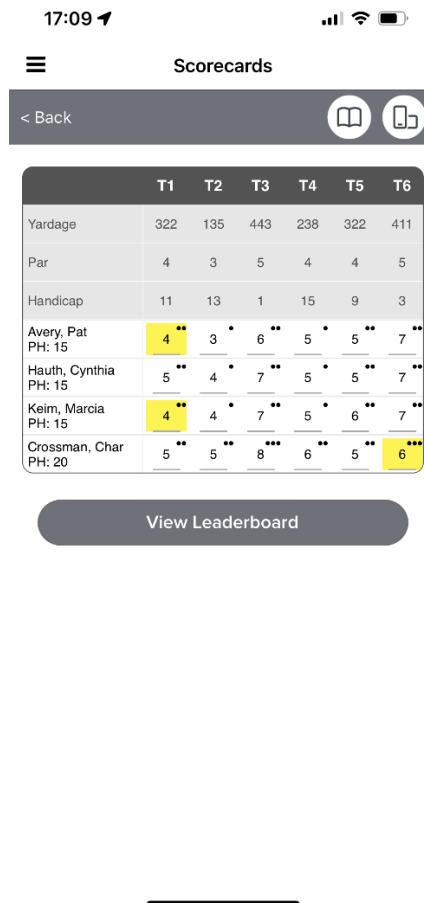

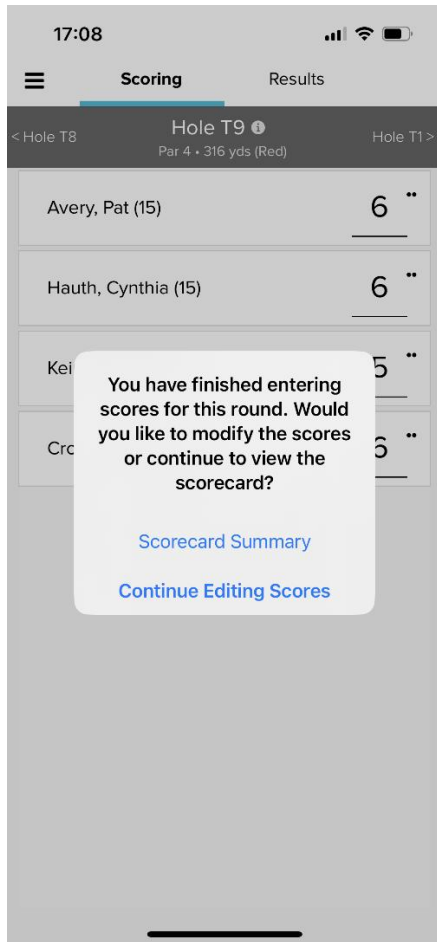

The 1st hole of the round will show on your screen. It will show all players in your group as well as the POPs each player receives for each hole.

After completion of the hole, enter the scores for your group. **DO NOT ENTER AN “x” FOR HOLES WHERE YOU HAVE PICKED UP DUE TO REACHING YOUR MAXIMUM STROKE SCORE.** When correct, press “Save Scores”. The APP will automatically forward to the next hole.

After you complete the last hole, press “scorecard summary”. This will show your completed scorecard.

The group must keep 1 paper scorecard. **FOR SCORES WHERE YOU HAVE PICKED UP ENTER YOUR MAXIMUM STROKE SCORE PRECEDED BY AN “X” ON THE PAPER SCORECARD.** Reconcile the paper scorecard to the mobile entry scores just as you would if there were 2 paper scorecards. The paper scorecard must be signed by all players in the group and turned in. (Place in green box in computer room.).
