

# READY GOLF TIPS

## Ready Golf Speed Tips

To implement ready golf and speed up your round, consider the following tips:

- **Start your pre-shot routine:** Begin your pre-shot routine as you walk to your ball, not after you get there. This includes assessing your shot, making a decisive club selection, and checking the wind. **TAKE MORE THAN ONE CLUB if walking from the cart. ALSO TAKE YOUR RANGE FINDER and DIVOT MIX.**
- **Limit practice swings:** Keep practice swings to one or two to avoid wasting time.
- **Use the three-minute rule:** Adhere to the three-minute limit for searching a lost ball to significantly reduce delays. **WATCH YOUR BALL** after the hit to better your awareness of landing area.
- **Play when safe:** Ensure that you and your playing partners are out of the line of fire before your shot. However, **DO** feel free to walk to your ball while others are hitting, begin your prep for your shot while others are hitting.
- **Communicate:** If someone else is preparing their putt, go ahead and putt. A quick "Mind if I go?" is all it takes.
- **Be aware of the group:** If someone is cleaning clubs or walking over, go ahead and hit. Keep things moving without rushing anyone.
- Park your carts closest to the next tee box.....avoid walking **BACK** toward the tee.
